Dear Mary,

I am ~~sorry~~ I haven't written so long. I was very busy last month but now school is over and I can write a letter to you. Things are going well for me. In your last letter you asked me to write a few words about my school and learning there natural sciences.

I like to study natural sciences. I support the opinion that these sciences are very useful and important today. They are a necessity of our modern life. Modern science is a collection of hundreds of sciences, which are exploring different spheres of reality. They are physics, chemistry, astronomy, biology, physiology and others.

Negative aspects of learning natural sciences

are is the fact that when studying natural sciences it is impossible to be guided only by logic.

Studying of any subject - a difficult task. Natural sciences aren't an exception. At the same time there is no optimum way of studying which will be suitable for all. Each person is unique, so everyone defines the way which is most suitable for itself. If one of way doesn't work, then try following. Don't give up. When you find the most suitable way, begin to work on bringing it to perfection.
